£10 REWARD.—TELEGRAPHIC CODES.—*Several Firms, Companies, and others having, in forming Codes of their own, appropriated parts and infringed the Copyrights of the A B C and A 1 Telegraphic Codes, the above Reward will be paid to any person giving INFORMATION leading to an injunction against the compilers, printers, publishers, or users of such Codes.—Address: Author, care of Publishers, EDEN FISHER & CO., LIMITED, 6, 7, and 8 Clement's Lane, London, E.C.*

PREFACE.

THE Author of the 'A B C Telegraphic Code' has been induced, at the earnest request of very many friends, to issue a FIFTH EDITION of the '**A B C Telegraphic Code.**' In doing so, he begs to tender his sincere thanks to those who have not only encouraged him with their promises and good wishes, but have also aided him by their valuable suggestions, and he trusts that this work will be as favourably received by the commercial world as the former editions.

The first edition was published in 1872—the pioneer of Telegraphic Codes.

This is a practical, not a theoretical work: the outcome of a life's experience of commercial intercourse with all parts of the world.

'An ounce of practice is worth more than a ton of theory.'

A PRACTICAL BUSINESS WORK FOR BUSINESS PEOPLE BY A BUSINESS MAN.

SIMPLICITY, ECONOMY, and SECRECY are still the three great objects which the Author has kept in view.

With regard to SIMPLICITY, every sentence is identified with and represented by a single Code word. This is the simplest and easiest possible method for any Telegraphic Code.

The ECONOMY of using this Code will be seen at a glance. Very frequently a single Code word represents a complete message, and in other cases a Code word would represent from four or five to upwards of twenty ordinary words. The saving effected on a single foreign message would therefore in many cases more than repay the cost of a copy of the volume, and in a short time the saving would be quite a hundredfold. It will, of course, be necessary that any mercantile house using this Code should see that their friends with whom they wish to communicate are supplied with a copy; the cost of which, as before remarked, will be insignificant when compared with the saving effected.

The SECRECY of the message between two persons can be made absolute, even though any other person may have every command of the telegram and of the contents of the volume. Every sentence is identified with a Code Number of five figures to be found in 1 2 3 4 5 6 7 8 9 0, which can be represented by a word, sentence, or group of ten different letters of the alphabet, after the same manner as a tradesman places a private mark on his goods to denote price, &c. All that is necessary is that the two persons shall agree upon any ten different letters that may suggest themselves. A familiar word or sentence will most easily adapt itself—*i.e.*, 'Mayflowers,' 'Valkyriens,' 'Codfishery.' Examples may be found on pages viii and ix. It will be seen thereby that the number of possible variations is practically unlimited; consequently, the choice of a Code of ten letters is also unlimited, their great variety admitting of frequent changes if necessary; in fact, the change might be made for every message, or every hour, by agreed arrangement, and thus the absolute secrecy of the Code maintained.

Particular attention is drawn to the following Regulations of the International Telegraph Convention:—

1. All telegrams must be legibly written.
2. Code telegrams are those composed of words the context of which has no intelligible meaning. Proper names are not allowed in the text of Code telegrams, except in their natural sense. Words of more than ten letters are not allowed.
3. In Code telegrams only Dutch, English, French, German, Italian, Portuguese, Spanish, and Latin may be employed, but words of any or all of these languages will be allowed in one telegram.
4. Cipher telegrams are those containing series or groups of figures or letters having a secret meaning or words not to be found in a standard dictionary of the language. The cipher must be composed exclusively of figures or exclusively of letters.
5. Telegraph Companies can demand the production of Codes and/or vocabularies for the purpose of carrying out the above regulations.

In reference to the above paragraphs all the Code Words in this book have been revised and approved by the '**Bureau international des Administrations télégraphiques à Berne, 1901.**'

The aim of the Author has been to render this work as comprehensive, correct, and complete as possible, but neither he nor the printer or publisher accepts responsibility for any consequences or elaim of any sort arising from error, or want of instruction or explanation, or other cause of any kind in connection therewith.

It has been brought to the Author's knowledge that some persons have purchased a single copy of his previous Codes for service in compiling Codes of their own. The Author would intimate that such an operation is a breach of the Copyright Act, and liable to become a matter of legal and unpleasant procedure.

EXAMPLE OF CIPHER MESSAGE.

With regard to SECRET telegraphy in cipher, choose any ten different letters of the alphabet ; for example, 'Abecikodus,' to represent

I	2	3	4	5	6	7	8	9	0.
A	B	E	C	I	K	O	D	U	S

 As most of the sentences are numbered above 9999 it is necessary to make them all of five figures each ; for this reason noughts must be prefixed until the number 10,000 is arrived at. If this plan be not adopted some confusion will arise to the receiver, as the letters will become mixed up.

MESSAGE.

'There is an unfavourable change in the market. Do not commence packing until you have further instructions. What is the smallest quantity you can send ?'

The above message by this plan will be as follows :—

CODED.

bidbs | bueds | ebaod

All that the receiver has to do is to tick off the message into groups of five letters each as above.

CAUTION.—In using cipher messages regard must be had to the Regulations relating to 'Foreign Telegrams' as published in the official 'Post Office Guide.'

EXAMPLE CIPHER CODES.*

The following tables have been compiled to illustrate the formation and selection of secret codes ; and to avoid possible confusion, the letters J and W have been purposely omitted, because of their similarity to I and V respectively, which are by some methods of telegraphy frequently made to do duty for each other.

(Take any 10 letters reading from left to right, or from right to left.)

05300	<i>Balduque</i>	Berth freights are depressed and lower
05301	<i>Baldwin</i>	Berth rates are unaltered
05302	<i>Balearic</i>	Cannot do anything on the berth, vessels at present here are doing nothing
05303	<i>Baleira</i>	Vessels on the berth experience great difficulty to secure the complement of their cargoes
05304	<i>Balefully</i>	For vessels on the berth there is nothing doing, cargo is so scarce that lower rates will have to be accepted
05305	<i>Balegoes</i>	Even at miserably low rates vessels on the berth have great difficulty to secure cargo
05306	<i>Baleigour</i>	Several vessels now here would gladly take the berth even at low rates
05307	<i>Baleineau</i>	Berth freights by steamers totally demoralized
05308	<i>Baleniére</i>	Berth freights by sailers totally demoralized
05309	<i>Balenosi</i>	Besieged.
05310	<i>Balesdens</i>	— is reported besieged
05311	<i>Balesteiro</i>	We are now besieged

 It is the best that can be done
 The best that can be done is as follows
 Best thing that could be done
 I (we) think it best to
 I (we) think it best not to
 Shall I (we) do the best possible
 I (we) will do my (our) best
 Do the best possible
 Do the best you can to meet us
 I (we) will do the very best that can be done
 Do the best possible for all concerned
 Please allow me (us) to do the best I (we) can
 Do the best you can with the cargo per —
 Do the best you can with the cargo per — telegraphing prices
 I (we) leave you to do what you consider best
 I (we) will do my (our) best, compromise, cancel, or recharter
 It is the best that can be done at present, may be able to do better later on
 It is the best that can be done and do not think shall improve by waiting
 If it is the best that can be done, better close

Better.

What had better be done
 You had better
 You had better not
 He (they) had better
 He (they) had better not
 Is (are) there any better
 There is (are) no better
 It (they) will be better
 Is (are) slightly better
 Very much better
 Rather better just now
 Better keep back
 Better expedite
 Hope to do better
 Will most probably do better
 If you can do better
 If you cannot do better
 If you cannot do better we must look about elsewhere
 If you cannot do better we must send our orders through another house
 If you cannot do better I (we) accept your terms
 — can do better (than —)

Rate(s)—continued.

At same rate of freight as calling for orders, if ordered direct to —

Steamer has just been fixed at this rate

Sailer has just been fixed at this rate

Unless at greatly reduced rates

No inducement to pay advanced rate(s)

Forward vessels command higher rates

Backward vessels command higher rates

Following may be considered as current rate(s)

The following rates of freight have ruled in this market during the past week

Rates should improve now the season has ended

Rates should improve now return cargoes are scarce

The rates keep low, and for the present there is no prospect of improvement

Much higher rates will have to be paid unless tonnage comes in shortly

Much lower rates will have to be accepted unless tonnage is withdrawn and ordered elsewhere

Rates have given way owing to the large supply of tonnage

Rates have advanced owing to the scarcity of tonnage

Reaction.

Reaction has set in

Very little prospect of a reaction

Wait for a reaction

No use waiting for a reaction
